The Global Market for Energy Efficient Building Technologies is Expected to Reach $360 Billion in 2026, According to Navigant Research

Digitization is allowing improved building performance while also changing the competitive dynamics of the industry, report finds

May 25, 2017 – Boulder, CO – A new report from Navigant Research examines the global market for energy efficient building products and services, providing an analysis of market issues and global forecasts for revenue, segmented by product type, service type, region, and construction type, through 2026.

The landscape for energy efficient building technologies may be changing more rapidly today than it has at any point in its history. New market trends such as digitization, as a service offerings, the Internet of Things (IoT), and the ubiquitous nature of software systems are bringing new dynamics of operation and competition. According to a new report from @NavigantRSRCH, the global market for energy efficient building technologies is expected to reach $227.4 billion in 2017 and grow to nearly $360.6 billion in 2026.

“Participants in the energy efficient building equipment value chain are creating new and innovative products and services that broaden and deepen market penetration with increased simplicity, or through added sophistication, as well as investment and payback figures that better match the internal requirements of end-use customers,” says Tom Machinchick, principal research analyst with Navigant Research. “Companies that did not have the foresight to start assessing the digital transformation years ago will be at a serious disadvantage competing in the years to come.”

Digitization is allowing improved building performance while also changing the competitive dynamics of the industry, according to the report. Whether through acquisition or a strategic development and training plan, companies that are ready for evolving market dynamics can create a host of new market opportunities for themselves.

The report, Energy Efficient Buildings Global Outlook, analyzes the global market for energy efficient building products and services in nine key segments: HVAC, lighting, controls, water efficiency, water heating, building envelope, other, and commissioning and installation services. The study provides an analysis of the market issues, including market drivers and hurdles,
opportunities, and current market trends, related to energy efficient building technologies. Global market forecasts for revenue, segmented by product and service type, region, and construction type, extend through 2026. The report also examines the key regional market dynamics and technologies related to energy efficient building products and services, as well as the competitive landscape. An Executive Summary of the report is available for free download on the Navigant Research website.

About Navigant Research
Navigant Research, the dedicated research arm of Navigant, provides market research and benchmarking services for rapidly changing and often highly regulated industries. In the energy sector, Navigant Research focuses on in-depth analysis and reporting about global clean technology markets. The team’s research methodology combines supply-side industry analysis, end-user primary research and demand assessment, and deep examination of technology trends to provide a comprehensive view of the Energy Technologies, Utility Transformations, Transportation Efficiencies, and Buildings Innovations sectors. Additional information about Navigant Research can be found at www.navigantresearch.com.

About Navigant
Navigant Consulting, Inc. is a specialized, global professional services firm that helps clients take control of their future. Navigant’s professionals apply deep industry knowledge, substantive technical expertise, and an enterprising approach to help clients build, manage and/or protect their business interests. With a focus on markets and clients facing transformational change and significant regulatory or legal pressures, the Firm primarily serves clients in the healthcare, energy and financial services industries. Across a range of advisory, consulting, outsourcing, and technology/analytics services, Navigant’s practitioners bring sharp insight that pinpoints opportunities and delivers powerful results. More information about Navigant can be found at navigant.com.
